The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: A METHOD FOR PURIFICATION OF CONTAMINATED WATER.

The disclosure is objected to because of the following informalities: In the specification on pages 17-19 "Figures 4, 5, and 6" appear to be erroneous, because the components of the exemplary embodiments appear to be shown in Figures 1, 2, and 3; and pipes 4 and 12 as shown in Figure 1 do not appear to be described.

Appropriate correction is required.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1 "some" and in claims 6-9 "preferably" are vague and indefinite because it is unclear how these terms further limit the claims. In claim 1 "the hydrate", in claim 3 "the contaminants", in claim 5 "the harvested hydrates", in claim 8 "the hydrated particles", and in claim 9 "the hydrate harvesting process" lack clear antecedent basis. Claim 1 is considered incomplete because it is essential to the instant method that sufficient hydrate grains or hydrate particles of a size as recited in instant claim 8, be recycled with the mixture of hydrate and contaminated water to cause spontaneous hydrate formation in the first container in view of pages 10 and 17 of the instant specification. Claims 2, 4, and 10 depend from the above claims.

Claims 1-10 properly written to overcome the above 35 USC 112 rejection would be allowable.

It is requested that applicants present a translated copy of NO patent 311,854 disclosed on page 11 of the instant specification, or English equivalent thereof.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
